The Power of Accounting: What the Numbers Mean and How to Use Them provides a highly readable text for non-financial managers.It explores accounting ' s uses and limitations in the management process. The text is intended for users of accounting information as opposed to preparers.

Accounting has become known as the language of business. This new edition is written to meet the needs of those students who will not be accountants but who do need to understand accounting to learn the key language that embarks us in the business world. Marshall, the leading text in the Survey market, takes readers through the basics: what accounting information is, what it means, and how it is used. The authors help students succeed through clear and concise writing, a conceptual focus and unparalleled technology support. In using this text, students examine financial statements and discover what they do and do not communicate. This enables them to gain the crucial decision-making and problem-solving skills they need in order to succeed in a professional environment.

The Power of Accounting: What the Numbers Mean and How to Use Them provides a highly readable text for non-financial managers. It explores accounting ' s uses and limitations in the management process. The text is intended for users of accounting information as opposed to preparers. It focuses on aiding the reader in understanding what accounting numbers mean, what they do not mean, when and how they can be used for decision making and planning and when they cannot. The book discusses the importance of accounting information in the economy and the fact that accounting numbers are often the result of estimates and arbitrary allocations. It also includes a cautionary word about the imprecise use of terminology often found in accounting and financial literature.

This new Australian adaptation is based on the successful US book, now in its 6th edition. The text has an accounting user focus and is intended for the one-semester introductory accounting unit. These courses are typically undertaken by accounting and non-accounting majors, as well as postgraduate and MBA students. Whilst the underlying strengths of the US edition have been retained, some significant changes have been made, both as a result of market feedback and the author's own experience whilst teaching Australian students from the US edition. In meeting market demands for the most relevant topical issues a new chapter on corporate governance and ethics has been added.

Accounting has become known as the language of business. This new edition is written to meet the needs of those students who will not be accountants but who do need to understand accounting to learn the key language that embarks us in the business world. Marshall, the leading text in the Survey market, takes readers through the basics: what accounting information is, what it means, and how it is used. In using this text, students examine financial statements and discover what they do and do not communicate. This enables them to gain the crucial decision-making and problem-solving skills they need in order to succeed in a professional environment. The new edition still has a strong focus on Return on Investment while updated content is integrated throughout.
