This book demonstrates that societies experiencing prolonged and severe crises of legitimacy are prone to intense and persistent political violence. The most significant factor accounting for the persistence of intense political violence in Uganda is the severe crisis of legitimacy of the state, its institutions, political incumbents and their challengers. This crisis of legitimacy, which is shaped by both internal and external forces, past and present, accounts for the remarkable continuity in the history of political violence since the construction of the state.

Good Hope in the south, and the surrounding islands from Cape Verde in the west to Madagascar, Mauritius, and Seychelles in the east, the Encyclopedia of African History is a new A-Z reference resource on the history of the entire African continent. With entries ranging from the earliest evolution of human beings in Africa to the beginning of the twenty-first century, this comprehensive three volume Encyclopedia is the first reference of this scale and scope. Also includes 99 maps.

Slavery in the Great Lakes Region of East Africa is a collection of ten studies by the most prominent historians of the region. Slavery was more important in the Great Lakes region of Eastern Africa than often has been assumed, and Africans from the interior played a more complex role than was previously recognized. The essays in this collection reveal the connections between the peoples of the region as well as their encounters with the conquering Europeans. The contributors challenge the assertion that domestic slavery increased in Africa as a result of the international trade. Slavery in this region was not a uniform phenomenon and the line between enslaved and non-slave labor was fine. Kinship ties could mark the difference between free and unfree labor. Social categories were not always clear-cut and the status of a slave could change within a lifetime. Contents: - Introduction by Henri Médard - Language Evidence of Slavery to the Eighteenth Century by David Schoenbrun - The Rise of Slavery & Social Change in Unyamwezi 1860–1900 by Jan-Georg Deutsch - Slavery & Forced Labour in the Eastern Congo 1850–1910 by David Northrup - Legacies of Slavery in North West Uganda ' The One-Elevens ' by Mark Leopold - Human Booty in Buganda: The Seizure of People in War, c.1700–c.1900 by Richard Reid -

This collection of essays on pre-colonial sub-Saharan African military history is drawn from a number of academic journals and includes some which are considered milestones in African historiographical discourse, as well as others which, while lesser known, provide remarkable insight into the unique nature of African military history. Selections were made so as to produce an introduction to the understudied field of pre-colonial African military history that will be useful to specialists and non-specialists alike. The volume also contains an introduction which presents one of the first significant reviews of pre-colonial African military historiography ever attempted.

The acclaimed Dictionary of African Historical Biography, the only single-volume biographical work on Sub-Saharan African history, has been expanded and updated to include entries on over eight hundred people important in Sub-Saharan African history up to 1980. The acclaimed Dictionary of African Historical Biography, the only single-volume biographical work on Sub-Saharan African history, has been expanded and updated to include entries on over eight hundred people important in Sub-Saharan African history up to 1980.

Historical Archaeology in Africa is an inquiry into historical questions that count, proposing different ways of thinking about historical archaeology. Peter Schmidt challenges readers to expand their horizons. Confronting topics of oral traditions, the role of cultural landscapes in social memory, and historical misrepresentations of various cultures, Schmidt calls for a new pathway to an enriched, more nuanced, and more inclusive historical archaeology. Allowing Africa to speak for itself without colonial interpreters, Historical Archaeology in Africa will be of interest not only to historians and archaeologists, but to all concerned with Africa's past and present.

This book is the first major study in several decades to consider Uganda as a nation, from its precolonial roots to the present day. Here, Richard J. Reid examines the political, economic, and social history of Uganda, providing a unique and wide-ranging examination of its turbulent and dynamic past for all those studying Uganda's place in African history and African politics. Reid identifies and examines key points of rupture and transition in Uganda's history, emphasising dramatic political and social change in the precolonial era, especially during the nineteenth century, and he also examines the continuing repercussions of these developments in the colonial and postcolonial periods. By considering the ways in which historical culture and consciousness has been ever present - in political discourse, art and literature, and social relationships - Reid defines the true extent of Uganda's viable national history.
