Developers who want to access USB devices from their embedded systems will find a helpful resource in USB Embedded Hosts: The Developer's Guide. This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics,

speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.

The true story of Theresa Knorr, the twisted child abuser who murdered her daughters—with the help of her sons—told by a former New York Times reporter. In June 1985, Theresa Cross Knorr dumped her daughter Sheila's body in California's desolate High Sierra. She had beaten Sheila unconscious in their Sacramento apartment days earlier, then locked her in a closet to die. But this wasn't the first horrific crime she'd committed against her own children. The previous summer, Knorr had shot Sheila's sister Suesan, then ordered her son to dig the bullet out of the girl's back with a knife to hide the evidence. The infection that resulted led to delirium—at which point Knorr and her two sons drove Suesan into the mountains, doused her with gasoline, and set her on fire. It would be almost a decade before her youngest daughter, Terry Knorr Graves, revealed her mother's history of unfathomable violence. At first, she was met with disbelief by law enforcement and even her own therapist. But eventually,

the truth about her monstrous abuse emerged—and here, an award-winning journalist details the jealousy, rage, and domineering behavior that escalated into homicide and shattered a family. A former reporter for the New York Times and Los Angeles Times and the author of true-crime classics including *Angel of Darkness*, about serial killer Randy Kroft, and *Blood Cold*, about Robert Blake and Bonny Lee Bakley, Dennis McDougal reveals the shocking depths of depravity behind a case that made headlines across the nation.

This volume addresses the fraught relationship between market and society in times of social and economic crisis, exploring how they interact in key social, cultural, and political arenas on a global scale. The contributors examine the neoliberal market in anthropological and ethnographic terms to question whether “market logic” has won out against social aspects of human existence in a framework of minimal state protection and the devaluation of human labor. Fruitfully combining empirical data and theoretical approaches, the volume investigates the extent to which ordinary people accept unequal allocations of resources and examines their sense of belonging in an expansive neoliberal economy.

David A. Carter brings the unique aesthetic of his award-winning color series to the younger set in *The Happy Little Yellow Box*. This highly interactive novelty book follows a friendly yellow box as he journeys high and low, near and far—until finally resting in a spot that is “just right.” This fun, engaging read introduces the first concepts of colors, counting, shapes, and opposites through the use of pop-ups, pull-tabs, and more!

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and

the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

This book presents a vivid description of the solutions that researchers have discovered for ethical dilemmas that pose themselves at studying disadvantaged, vulnerable and victimized populations. Ethical codes prescribe that the scholar should in all circumstances avoid potential harm, that informed consent is necessary and that the limits of confidentiality should always be respected. However, in the practice of research among women involved in prostitution, illegal immigrant workers, enslaved children, people who sell their organs and all the traffickers thereof, the ethical rules cannot always be followed. This book shows that there is a surprising variety of arguable possibilities in dealing with ethical dilemmas in the field. Authors reflect on concrete experiences from their own fieldwork in a wide variety of settings such as the USA, Singapore, Kosovo and The Netherlands. Some choose to work on the basis of conscientious partiality, others negotiate the rules with their informants and still others purposely break the rules in order to disclose and damage the exploiters. Researchers may find themselves in a vulnerable position. Their experiences, as presented in this volume, will help field

workers, university administrators, representatives of vulnerable groups, philosophers of ethics and most of all students to go into the field well-prepared. This is a book that every researcher planning to do fieldwork in the difficult field of hidden, illicit and victimized people should read in advance. Dr. Frank Bovenkerk, Professor (Emeritus), Willem Pompe Institute for Criminal Law and Criminology, Universiteit Utrecht, The Netherlands This book allows a peek in the kitchen of empirical fieldwork, going into not only "best practices," but mistakes made, in a frank, courageous and honest way.
