The 737 is Boeing's only narrow-body airliner in production, with the -600, -700, -800, and -900ER variants currently being built. A re-engine and redesigned version, the 737 MAX, is set to debut in 2017. Originally envisioned in 1964, the initial 737-100 flew in 1967 and entered airline service in February 1968.

B738, Alicante Spain, 2018 (On 7 June 2018, a Boeing 737-800 operated by a non-Spanish speaking crew was given takeoff clearance at Alicante after the same supervised student controller had previously cleared two vehicles to begin a full-length opposite-direction runway inspection in Spanish. The controller error was only recognised when the vehicles were able to transmit that they were still on the runway, the aircraft crew being unaware of the conflict until then told to reject the takeoff.

In 1998, Boeing again heavily revised the 737, with the 600, 700, 800 and 900 variants, designated ' NG ' (Next Generation). These aircraft featured FADEC controlled CFM56-7 high-bypass turbofan engines, larger and more efficient wings (without winglets in some cases), a strengthened fuselage, revised avionics, and a higher cruise speed.
