placed on general models (Markov chains, random fields, random graphs), universal methods (the probabilistic method, the coupling method, the Stein-Chen method, martingale methods, the method of types) and versatile tools (Chernoff's bound, Hoeffding's inequality, Holley's inequality) whose domain of application extends far beyond the present text.

Bremaud is a probabilist who mainly writes on theory. This is no exception. It is an advanced mathematical text on Markov chains and related stochastic processes. As with most Markov chain books these days the
