This book is one of the first fully-fledged studies to examine the next world-class industrial leaders emerging from China and India; exploring the domestic and international factors that have led to their rise, and comparing their experiences with other East Asian late-comers such as Japan.

øIn the past two decades, China has experienced rapid industrial and economic growth. This fascinating book explores the unique Chinese business strategy of vigorous market entry and low prices, which has been the key feature of this accelerated indust

Using a combination of theoretical analysis and case studies, this book analyses the theoretical issues — concept and type of independent innovation, and the practical issues — construction of institutional system which is in favor of independent innovation. It is written for researchers who are engaged in similar fields and readers who are interested in independent innovation. In this book, a comparison of the independent innovation modes of China, Japan and South Korea is presented. The ability, mode and track are defined clearly. The efficient path of Chinese independent innovation is put forward through case studies. Contents: IntroductionThe Urgency for Implementation of Independent Innovation Strategy in ChinaThe Efficient Path Towards Chinese Independent Innovation: Understanding Through Case StudiesThe Capacity, Mode and Trajectory of Chinese Independent InnovationThe Method and Mechanism of Technology Integration in Enterprise Independent InnovationThe Institutional Guarantee of Chinese Independent Innovation: The Construction of an Innovation System Readership: Researchers, students and the general public who are interested in innovation. Keywords: Independent Innovation; Innovative Country;Innovation System;Innovation Subject;Market for TechnologyReview: Key Features: In this book, a comparison of the independent innovation modes of China, Japan and South Korea is presentedThe referential experience is summarized on the basis of the case study of the process of enterprise independent innovation

This book focuses on China's economic transformation at firm and institution levels. It shares insights into the growth of innovative Chinese firms in the automobile and telecom equipment sectors, both of which promoted social dialogue of policy-making and ultimately contributed to a policy paradigm shift in China's 'indigenous innovation'. The book illustrates, through case studies on firms like Geely, the Chery, the BYD, Huawei, the ZTE and the DTT, how these firms behave differently from other local actors and what social conditions had contributed to their success. The book will help those who are interested to learn more about the rise of innovative Chinese firms to better understand the dynamics of China's industrial progress.

This book examines China, the world's largest auto market since 2008 and the story of how Chinese auto-makers developed is the story of the Chinese economy in microcosm. It focuses on China's systemically important automobile sector, this book reveals how local institutions have moderated structural changes at national and global levels, and consequently generated significant organizational diversity in the production sphere.This book begins with the intriguing observation that individual Chinese car makers have been evolving in different directions despite a shared context; what factors led to these diverse choices and positioning? It is the central aim of this book to explain the variety of institutional forms used by Chinese car manufacturers in navigating the market transition and answering the challenges posed by globalization.

This is a comprehensive guide to modifying the 1991 – 2006 Nissan Sentra, NX, and 200sx and Infiniti G20 for street and racing performance. It includes sections on models and engines, engine theory, bolt-on performance components, cylinder heads and bottom end modifications, forced induction, engine swaps, brakes, suspension, wheels and tires, cosmetic and aerodynamics, and safety.

Analyzes China's economic rise and its impact on global affairs, assessing China's weaknesses--environmental pollution, crisis in social trust, and faltering government institutions--in terms of their effects on the world.

The contributors provide a comparative analysis of the modern economic development of Japan and China that are often explained in frameworks of East Asian developmentalism, varies of capitalism or world economic system, and explore their broader significances for the rise and global expansion of modern economy.

How could one company—General Motors—meet disaster on one continent and achieve explosive growth on another at the very same time? While General Motors was hurtling towards bankruptcy in 2009, GM’s subsidiary in China was setting new sales and profit records. This book reveals how extraordinary people, remarkable decisions and surprising breaks made triumph in China possible for General Motors. It also shows just how vulnerable that winning track record remains. No small part of GM’s success in China springs from its management of shifting business and political relationships. In China, the government makes the rules for—and competes in—the auto industry. GM’s business partner, the City of Shanghai, is both an ally and a competitor. How does such an unnatural relationship work on a day-to-day basis? Where will it go on the future? General Motors also engages in constant battles with other global and Chinese car makers for the hearts of demanding Chinese consumers. Dunne gives us rare glimpses into the mindsets and behavior of this new moneyed set, the worlds newest class of wealthy consumers. China is already the number one car market in the world. During the next ten years, China will export millions of cars and trucks globally, including to the United States. American Wheels, Chinese Roads presents readers with fascinating illustrations of what to expect when Chinese cars, companies, and business people arrive on our shores.

In the rapid growth of the Chinese economy as the “world’s factory and market”, while this process has been supported by foreign companies, local Chinese companies have also emerged in the brief span of about 10 years to become major players. This is an extremely rare case in the world history and recently even among the BRICs and the NIEs. One cannot help but wonder what strategic positions foreign firms have adopted to cope with the extraordinary, fierce challenges they have had to face from local Chinese firms. A workshop discussed and illuminated the corporate activities and competitive and cooperative strategies of both Chinese and foreign firms from the perspective of Japanese, European, US and Asian firms.
