Right: Tim and I are going to a movie tonight. Why? If you take Tim out of the sentence, "you" are the subject. You are going to a movie. When you're going to a movie, what do you say? "I am going to a movie." You wouldn't say, "Me am going to a movie." When you add Tim, the sentence construction remains the same.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller Guitar Zero At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

"Tim Worstall, always clear thinking, nails the myths that grow up around economics in this useful book. A terrific compendium of fallacies and their refutations." Matt Ridley, author of the Rational Optimist. This book is simply a discussion of those errors which I've had to repeatedly correct in this past decade of my writing about matters economic. It gets rather boring having to point out the same errors again and again: thus putting the explanations into one simple format handy for waving at people rather than having to trot out the same old explanation again. This book is an idiosyncratic look at a number of common economic fallacies and mistakes. It does not pretend to be exhaustive, a thorough examination of all the mistakes that economics, both folk and formal, can become prey to. Rather, it's about those that I've come across and find that I have to continually point out the folly of. For example, the Labour Theory of Value has been around for a long time and forms the heart of the basic underpinnings of Marxism. Yet it was disproved at around the time that Marx was publishing Das Kapital: and it has remained wrong since then whatever the insistences of the ideologues. So there is a simple explanation of why that particular theory is wrong. On what is perhaps more my side of the fence, free market zealotry (and I confess to being a market zealot) it is also wrong to proclaim that free markets can and will solve every problem. This is not, sadly, so: there are times when interventions must be made, even times when something must be done and government is the only actor able to do that thing.

Factfulness meets How to Be Right in this major new book from globally bestselling economist Tim Harford 'Tim Harford is our most likeable champion of reason and rigour... clear, clever and always highly readable' Times Books of the Year 'If you aren't in love with stats before reading this book, you will be by the time you're done. Powerful, persuasive, and in these truth-defying times, indispensable' Caroline Criado Perez, author of Invisible Women 'Nobody makes the statistics of everyday life more fascinating and enjoyable than Tim Harford' Bill Bryson 'Fabulously readable, lucid, witty and authoritative. . . Every politician and journalist should be made to read this book, but everyone else will get so much pleasure and draw so much strength from the joyful way it dispels the clouds of deceit and delusion' Stephen Fry 'Wise, humane and, above all, illuminating. Nobody is better on statistics and numbers - and how to make sense of them' Matthew Syed THE SUNDAY TIMES BUSINESS BESTSELLER When was the last time you read a grand statement, accompanied by a large number, and wondered whether it could really be true? Statistics are vital in helping us tell stories - we see them in the papers, on social media, and we hear them used in everyday conversation - and yet we doubt them more than ever. But numbers - in the right hands - have the power to change the world for the better. Contrary to popular belief, good statistics are not a trick, although they are a kind of magic. Good statistics are not smoke and mirrors; in fact, they help us see more clearly. Good statistics are like a telescope for an astronomer, a microscope for a bacteriologist, or an X-ray for a radiologist. If we are willing to let them, good statistics help us see things about the world around us and about ourselves - both large and small - that we would not be able to see in any other way. In How to Make the World Add Up, Tim Harford draws on his experience as both an economist and presenter of the BBC's radio show 'More or Less'. He takes us deep into the world of disinformation and obfuscation, bad research and misplaced motivation to find those priceless jewels of data and analysis that make communicating with numbers worthwhile. Harford's characters range from the art forger who conned the Nazis to the stripper who fell in love with the most powerful congressman in Washington, to famous data detectives such as John Maynard Keynes, Daniel Kahneman and Florence Nightingale. He reveals how we can evaluate the claims that surround us with confidence, curiosity and a healthy level of scepticism. Using ten simple rules for understanding numbers - plus one golden rule - this extraordinarily insightful book shows how if we keep our wits about us, thinking carefully about the way numbers are sourced and presented, we can look around us and see with crystal clarity how the world adds up.

The Doctrine of Sola-Scriptura (Bible Only) teaches that Scripture (the Bible) alone is the sole source of authority for the Christian and the Church. Coined and promulgated by Martin Luther and John Calvin (1500's), this doctrine has become the ground-floor upon which all of the doctrine of Protestant-Christianity has been built. If it can be proven that Sola-Scriptura is in error and that it is an innovation to orthodox Christianity, the entire body of purely Protestant doctrine will be, subsequently, rendered void. Using Scripture itself, reason, and a spoon full of humor, David L. Gray (also called Yoseph Daviyd) brilliantly reduces the doctrine of Sola-Scripture to absolute absurdity; thus rendering all of Protestantism Dead on Arrival. This book is a must have for all Christians who love sacred Scripture and desire to use it as God intended. This the Second Edition - The changes to the text from the previous version include additional material,

modification to images, and correction of typos.

Winner of the 2001 National Book Award for Fiction Nominated for the National Book Critics Circle Award An American Library Association Notable Book Jonathan Franzen's third novel, *The Corrections*, is a great work of art and a grandly entertaining overture to our new century: a bold, comic, tragic, deeply moving family drama that stretches from the Midwest at mid-century to Wall Street and Eastern Europe in the age of greed and globalism. Franzen brings an old-time America of freight trains and civic duty, of Cub Scouts and Christmas cookies and sexual inhibitions, into brilliant collision with the modern absurdities of brain science, home surveillance, hands-off parenting, do-it-yourself mental healthcare, and the anti-gravity New Economy. With *The Corrections*, Franzen emerges as one of our premier interpreters of American society and the American soul. Enid Lambert is terribly, terribly anxious. Although she would never admit it to her neighbors or her three grown children, her husband, Alfred, is losing his grip on reality. Maybe it's the medication that Alfred takes for his Parkinson's disease, or maybe it's his negative attitude, but he spends his days brooding in the basement and committing shadowy, unspeakable acts. More and more often, he doesn't seem to understand a word Enid says. Trouble is also brewing in the lives of Enid's children. Her older son, Gary, a banker in Philadelphia, has turned cruel and materialistic and is trying to force his parents out of their old house and into a tiny apartment. The middle child, Chip, has suddenly and for no good reason quit his exciting job as a professor at D----- College and moved to New York City, where he seems to be pursuing a "transgressive" lifestyle and writing some sort of screenplay. Meanwhile the baby of the family, Denise, has escaped her disastrous marriage only to pour her youth and beauty down the drain of an affair with a married man--or so Gary hints. Enid, who loves to have fun, can still look forward to a final family Christmas and to the ten-day Nordic Pleasurelines Luxury Fall Color Cruise that she and Alfred are about to embark on. But even these few remaining joys are threatened by her husband's growing confusion and unsteadiness. As Alfred enters his final decline, the Lamberts must face the failures, secrets, and long-buried hurts that haunt them as a family if they are to make the corrections that each desperately needs.
