Domain-Specific Languages (Addison-Wesley Signature ...
A Domain Specific Language (DSL) is a computer programming language of limited expressiveness focused on a particular domain. Most languages you hear of are General Purpose Languages, which can handle most things you run into during a software project. Each DSL can only handle one specific aspect of a system. So you wouldn't write a whole project in a DSL? No. Most projects will use one general purpose language and several DSLs Are they a new idea? Not at all.
