The year 2002 marks the bicentenary of the death of George Romney, one of the key figures in British art in the late 18th century. A chief rival of Sir Joshua Reynolds and Thomas Gainsborough - and for much of his career more fashionable than both - he was known both as a portraitist and as a draftsman. His countless studies for literary and mythological pictures, made in private moments but which he never had time to paint, are executed in a bold, spontaneous style that mark him as one of the first Romantics.

"Alex Kidson's excellent catalogue will no doubt set the standard for Romney scholarship for years to come. Its importance can scarcely be overestimated. Kidson has unearthed lost paintings and discovered unfamiliar drawings in little known private collections. He has presented many fresh ideas, corrected numerous errors in attribution, and revealed the present location of works. All of this provides invaluable, updated information."--Yvonne Dixon, Trinity College, Washington, D.C.
