Wireless Personal-Area Networks (WPAN)- Uses low powered transmitters for a short-range network, usually 20 to 30 ft. (6 to 9 meters). Bluetooth and ZigBee based devices are commonly used in WPANs. WPANs are based on the 802.15 standard and a 2.4-GHz radio frequency. Wireless Personal-Area Networks WPAN.

(PDF) Introduction to Wireless Networks

Introduction to Wireless Networks 15 Wireless Data Networks Each type of wireless data network operates on a specific set of radio frequencies. For example, most Wi-Fi networks operate in a special band of radio frequencies around 2.4 GHz that have been reserved in most parts of the world for unlicensed point-to-point spread spectrum radio services.
