DNA is our chemical blueprint, but the Human Genome Project found that over ninety percent of it is not coded. In fact, only approximately four percent creates the 23,000 genes in the Human body. The rest? It's a puzzle to the extreme, and to this day there is no answer why most of DNA seems to have no symmetry or codes of any kind. But Kryon now gives us a full revelation of the twelve layers, or energies of DNA. Could it be that our entire Akashic record is carried in our DNA? What else might be represented? It starts to make sense, and the most recent discoveries of quantum physics only enhances the potentials of this quantum molecule.

How consciousness and quantum energies affect your genetic expression and the development of disease and chronic health conditions • Draws on cellular medicine, genetics, quantum physics, and consciousness studies to define the real underlying mechanisms of disease and how they can be addressed • Explains how consciousness influences quantum DNA to erase the genetic imprint of illness, allowing your body to remember how to function efficiently and effectively • Shares the author's discoveries that enabled her to successfully heal the cellular dysfunction at the root cause of her cancer, tumors, chronic inflammation, and toxicity • Explores consciousness tools to re-encode DNA and includes detailed scripts for techniques that readers can apply to their own healing journeys Drawing on new advancements in quantum physics, cellular medicine, genetics, and consciousness studies, as well as her own journey of self-healing from a number of challenging health conditions, Althea S. Hawk reveals how you can consciously influence your DNA and re-encode it to improve your health and alter your genetic destiny. Sharing the discoveries that enabled her to successfully heal from her cancer, tumors, toxicity, and inflammatory-related conditions, the author explains how genes are not solely responsible for creating disease. She shows how human physiology interacts with the quantum energies of our external and personal environments and how the resulting information triggers the development and persistence of disease and chronic conditions. We each inherit susceptibilities, but it is our unique experience of these environmental factors, as well as our beliefs, thoughts, and emotions, that alter the way our genes are expressed. Detailing how our DNA is both quantum-energetic and biological-chemical, Hawk explains how your environment and your consciousness influence your quantum DNA, which in turn interacts with your biological DNA. By working directly with energetic information that affects how your quantum and biological DNA communicate, you can alter the expression of your genes by re-encoding the gene sequences on your physical DNA, erasing the imprint of illness and enabling your body to remember how to function properly. Hawk explores consciousness tools and mind-body techniques to re-encode your DNA, such as sound and breathing work, DNA marker removal, recalibration of Akashic information, and cellular communication exercises that readers can apply to their own healing journeys.
