L'età delle grandi scoperte geografiche raccontata ai miei alunni di seconda media.

This open access book presents the first detailed study of one of the most important masterpieces of Renaissance cartography, Martin Waldseemüller's Carta marina of 1516. By transcribing, translating into English, and detailing the sources of all of the descriptive texts on the map, as well as the sources of many of the images, the book makes the map available to scholars in a wholly unprecedented way. In addition, the book provides revealing insights into how Waldseemüller went about making the map -- information that can't be found in any other source. The Carta marina is the result of Waldseemüller's radical re-evaluation of what a world map should be;

he essentially started from scratch when he created it, rejecting the Ptolemaic model and other sources he had used in creating his 1507 map, and added more descriptive texts and a wealth of illustrations. Given its content, the book offers an essential reference work not only on this map, but also for anyone working in sixteenth-century European cartography.

Includes entries for maps and atlases.

Christopher Columbus returned to Europe in the final days of 1500, ending his third voyage to the Indies not in triumph but in chains. Seeking to justify his actions and protect his rights, he began to compile biblical texts and excerpts from patristic writings and medieval theology in a manuscript known as the Book of Prophecies. This unprecedented collection was designed to support his vision of the discovery of the Indies as an important event in the process of

human salvation - a first step toward the liberation of Jerusalem and the Holy Land from Muslim domination. This work is part of a twelve-volume series produced by U.C.L.A.'s Center for Medieval and Renaissance Studies which involved the collaboration of some forty scholars over the course of fourteen years. In this volume of the series, Roberto Rusconi has written a complete historical introduction to the Book of Prophecies, describing the manuscript's history and analyzing its principal themes. His edition of the documents, the only modern one, includes a complete critical apparatus and detailed commentary, while the facing-page English translations allow Columbus's work to be appreciated by the general public and scholars alike.

Exploring the diverse factors that persuaded Christopher Columbus that he could reach the fabled "East" by sailing west, Dante, Columbus and the Prophetic Tradition considers, first, the impact of Dante's Divine Comedy and the apocalyptic prophetic tradition that it reflects, on Columbus's perception both of the cosmos and the eschatological meaning of his journey to what he called an 'other world.' In so doing, the book considers how affinities between himself and the

exiled poet might have led Columbus to see himself as a divinely appointed agent of the apocalypse and his enterprise as the realization of the spiritual journey chronicled in the Comedy. As part of this study, the book necessarily examines the cultural space that Dante's poem, its geography, cosmography and eschatology, enjoyed in late fifteenth century Spain as well as Columbus's own exposure to it. As it considers how Italian writers and artists of the late Renaissance and Counter Reformation received the news of Columbus' 'discovery' and appropriated the figure of Dante and the pseudo-prophecy of the Comedy to interpret its significance, the book examines how Tasso, Ariosto, Stradano and Stigliani, in particular, forge a link between Dante and Columbus to present the latter as an inheritor of an apostolic tradition that traces back to the Aeneid. It further highlights the extent to which Italian writers working in the context of the Counter Reformation, use a Dantean filter to propagate the notion of Columbus as a new Paul, that is, a divinely appointed apostle to the New World, and the Roman Church as the rightful emperor of the souls encountered there.

Includes material on "European history from around 1450-1620."
