Interactive multimedia is clearly a field of fundamental research, social, educational and economical importance, as it combines multiple disciplines for the development of multimedia systems that are capable to sense the environment and dynamically process, edit, adjust or generate new content. For this purpose, ideas, theories, methodologies and inventions are combined in order to form novel applications and systems. This book presents novel scientific research, proven methodologies and interdisciplinary case studies that exhibit advances under Interfaces and Interaction, Interactive Multimedia Learning, Teaching and Competence Diagnosis Systems, Interactive TV, Film and Multimedia Production and Video Processing. The chapters selected for this volume offer new perspectives in terms of strategies, tested practices and solutions that, beyond describing the state-of-the-art, may be utilised as a solid basis for the development of new interactive systems and applications.

En la actualidad estamos sometidos a cambios y transformaciones constantes derivados del avance de la tecnología y su influencia en todos los ámbitos de nuestras vidas. Es por esto por lo que los educadores y las instituciones educativas no se pueden quedar al margen de las demandas que exige esta realidad. En este libro se abordan las posibilidades de las Tecnologías de la Información y la Comunicación (TIC) en diferentes entornos educativos ya que, igual que cambian las tecnologías, también cambian los entornos y los actores en la educación. Se trata de un manual dirigido a maestros en formación y en ejercicio, a educadores sociales y docentes en general, con el objetivo de orientarles en la aplicación de las TIC en su práctica educativa. Los autores, profesores especializados en Tecnología educativa de varias universidades, abordan temas que van desde la conceptualización y organización de las TIC, medios y recursos (radio, prensa, televisión, cine, publicidad y material multimedia), diseño y producción de contenidos digitales, hasta entornos virtuales, herramientas en la nube, innovación y recursos tecnológicos en contextos inclusivos.

Los medios de comunicación social online o social media son un tema de moda y de completa actualidad que surge a partir del modelo Web 2.0. Este término se refiere a los servicios web que hacen posible que los propios usuarios aporten, colaboren e intercambien ideas o contenidos. Con la Web 2.0 Internet deja de ser simplemente una nueva tecnología para adquirir una dimensión de vinculación social, una herramienta que permite unir a las personas. Con servicios como Facebook, Twitter, Blogs, Youtube o Foursquare nos relacionamos, recibimos noticias, expresamos nuestras opiniones y difundimos informaciones que nos ayudan a posicionarnos frente a la realidad que nos rodea. Es decir, son medios que permiten crear una red social, una comunidad que nos influye y en la que podemos influir. Desde el punto de vista del marketing, los medios de comunicación social online suponen una magnífica herramienta para establecer puentes de relación con clientes, consumidores, usuarios, prescriptores, clientes potenciales, proveedores, inversores, empleados, instituciones, patrocinadores, competidores y cualquier otro actor relevante de nuestro entorno personal y profesional. Asimismo, nos permiten atraer, mantener y mejorar las relaciones con todos ellos, lo que nos lleva a enriquecer nuestro capital social, a gestionar adecuadamente nuestra imagen o marca y a hacer posible que estas relaciones sean duraderas y de valor. En este libro se describe este nuevo entorno social en el que nos encontramos y se dan las claves para utilizar cada uno de los medios de comunicación social online de una forma eficiente y efectiva. Está dirigido especialmente a las empresas concienciadas con el potencial que tienen los social media en su estrategia de comunicación, así como a aquellas personas que desean promocionarse personal o profesionalmente a través de ellos.

This important new book offers an engaging and challenging introduction to the thorny paths of the globalization debate.
