In the present article I describe two perspectives of relational leadership: an entity perspective that focuses on identifying attributes of individuals as they engage in interpersonal relationships, and a relational perspective that views leadership as a process of social construction through which certain understandings of leadership come about and are given privileged ontology. These approaches can be complementary, but their implications for study and practice are quite different.

In 2015, Megan Reitz, a professor specialising in leadership, wrote the book 'Dialogue in Organizations', in which she describes the Relational Leadership Theory (RLT) that further explains the social processes of leadership within organisations. She investigates how relationships at work affect people and how this helps and hinders people in their ambitions in becoming the people they want to be.
