Following the publication of Seven Types of Ambiguity in 1930 William Empson was quickly recognised as a critic of great originality and unique creative gifts and he has inspired a whole new method and style of approach in literary criticism. But this is the first full-length study of his work and it is an important part of Dr Norris's purpose to account for the gulf that has emerged between Empson's viewpoint and the development of his ideas by others, especially the American New Critics, and for the consequent failure of Empson's later books to generate the informed discussion they demand and deserve. Here particular attention is given to his critical summa, The Structure of Complex Words. To understand Empson's work as a consistent whole, Dr Norris argues, one must relate it to his philosophy of humanistic rationalism. This is to give a new perspective not only to his practical criticism but also to his differences with Eliot and Leavis and to his anti-Christian polemic.

Some of William Empson's most passionate and controversial essays, including previously inaccessible pieces.

William Empson: Prophet Against Sacrifice provides the most coherent account of Empson's diverse career to date. While exploring the richness of Empson's comic genius, Paul H. Fry serves to discredit the appropriation of his name in recent polemic by the conflicting parties of deconstruction and politicized cultural criticism. He argues that Empson is a larger, more important figure than the orthodox in either camp can acknowledge, deserving to be considered alongside such versatile critics as Walter Benjamin, Kenneth Burke and Roland Barthes.

William Empson (1906SH84) was one of the twentieth century's most distinctive critical voices, and left a profound mark upon Anglo-American literary culture. This book is the first full study of Empson's literary criticism in its various aspects, taking account of recent developments in critical theory and of Empson's complex SH at times deeply antagonistic SH attitude towards those developments. In their diversity of viewpoint and critical approach the nine essays reflect this sturdy resistance to fashionable trends of 'Eng. Lit.' opinion. Topics include the relations between Empson and Derrida's approaches to the issue of textual 'undecidability', and Empson's prominent (if unwilling role) in the shaping of English as an academic discourse. Christopher Norris's extended introduction charts the ground and offers a major reevaluation of Empson's place in the theoretical tradition.

This volume gathers some of William Empson's most passionate and controversial essays and includes previously inaccessible pieces on influential Renaissance writers and scientists. Introduced by leading Empson scholar John Haffenden, this is a book for anyone interested in the Renaissance, the history of science, and the history of literary criticism.
